P-WAN Private Networks

Seamlessly link your multi-site network

P-WAN takes advantage of ChunkyChips' multiple-carrier infrastructure to deliver secure private networking.

P-WAN from ChunkyChips links all your UK sites in a locked-down private network. Using a familiar local IP network infrastructure, P-WAN completely locks down your multi-site offices, sub offices and even Home Workers into one secure mesh.

P-WAN from ChunkyChips is incredibly flexible. You can choose as many or as few sites as you need to start with, and add or amend as your business demands change.

With access to our London Data Centres as well as our bespoke Data Centre in Basildon, Essex, we can build optional complex layers of routing failover and redundancy to ensure your business network remains connected 24/7/365.

P-WAN from Chunkychips is the choice of global insurance underwriters, major pensions companies and dozens of other major organisations throughout the UK.

Fully scalable: Add or remove sites on demand

Totally secure, enterprise-grade business network

Fast to deploy

Fully Managed & Monitored

Cisco & Juniper-based architecture

Standard choice of large corporates UK-wide
