

Telephone Services

PSTN, ISDN and Discount Calls from ChunkyChips

We have access to the full range of BT-based telephone services, but can provide them at a fraction of the cost of your current provider

Whether your business has a single PSTN telephone line or multi-channel, multi-ISDN configuration, you can migrate your entire phone line setup over to ChunkyChips.

Our line rental rates are cheaper than major carriers, and yet still maintained at your local telephone exchange on identical equipment as your current setup.

Not only will we discount your line rental, we can usually discount your business call rates by nearly 35% off your current plan, including local, national, and international and mobile rates.

Want to see what you can save? Just send us your latest phone bill (we usually only need the front summary page) and we'll give you a full breakdown of potential savings by moving to us by return.

The migration process is completely seamless with no downtime to your business. Either migrate your whole setup or just your call plan to start saving.

Cheaper Line Rental

Huge Discounts on Calls

Seamless Migration

UK-Based Premium Support

Dedicated Account Management

Migrate your entire system or just your call plan

Same Business Day turnaround to analyse your current costs
